

Classroom Instruction that Works® Resources and Solutions

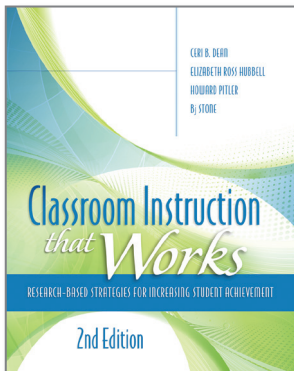

Translate research into classroom success
with books, workshops, training materials,
and customized professional development.

Classroom Instruction *that Works*

New framework for instructional planning helps teachers
be more intentional when using the strategies.

Ensure success for all students:

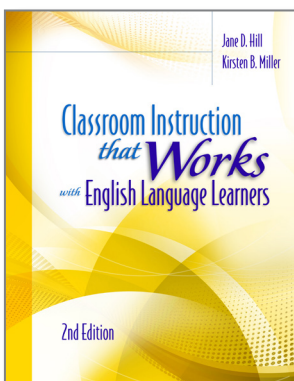

Apply proven classroom strategies and create a common vocabulary

Classroom Instruction that Works, Second Edition

We can help your school and district develop challenging, engaging, and intentional instruction in every classroom. Based on our best-selling series of books, our professional development helps your teachers apply strategies in the classroom that have been proven to have a positive influence on student achievement. Our Classroom Instruction that Works Instructional Planning Guide makes it easier for teachers to know when and why to use each strategy to support student success.

Our comprehensive array of solutions gets everyone on the same page about what good instruction looks like in the classroom so district staff, principals, and teachers can work together to accomplish what matters most: improving teaching and learning.

Classroom Instruction that Works with English Language Learners, Second Edition

Help your English-language learners (ELLs) excel. Our books and professional development solutions provide all teachers with practical guidance for adapting the Classroom Instruction that Works strategies to help ELLs progress through the critical stages of language development. Teachers learn how to develop students' language proficiency while engaging in regular classroom content so academic learning can continue even as students develop English fluency.

Bring our professional development on-site

Contact us today to bring our expert consultants to your district or region to deliver high-quality PD to your staff. Together, we'll design the right training, schedule, and cost to meet your needs.

Supercharge your teaching and lesson plans with technology!

Using Technology with Classroom Instruction that Works, Second Edition

In many schools and districts, big investments in technology—including interactive whiteboards and one-to-one device initiatives—have failed to provide tangible results for students. McREL technology workshops begin with a simple premise: the key to successful technology integration is effective teaching. Once teachers see how technology can enhance the nine research-based categories of instruction, they become more strategic in matching their use of software, multimedia, and other tools with learning objectives. Workshops can be tailored to focus on specific apps and hardware.

Power Walkthrough® Classroom Observation Seminar and Software

Become a more effective instructional leader and save time in the process with McREL's Power Walkthrough software. Our solution allows school leaders to easily record their observations of teacher practices, including the extent to which teachers are using research-based strategies, such as those from Classroom Instruction that Works. Power Walkthrough also aggregates data across general observations or an entire school to inform teacher coaching and schoolwide improvement efforts.

If your PD dollars are at a premium, consider co-hosting a McREL Institute at your location and inviting neighboring districts to attend for a fee. We'll help you plan and publicize the event.

Maximize your professional development investment

Improving instruction in every classroom requires articulating a clear, consistent, school- or districtwide approach to instruction. Through expert, hands-on analysis and guidance, we help you examine your current pedagogy and practices and deliver customized, research-based recommendations for developing a system-wide approach to instruction that provides everyone with a common vocabulary for teaching and sharing best practices.

When you work with McREL, you partner with a trusted organization of experts who put your success and the success of students first. We help you create a sustainable plan for teacher development and professional growth. We guide you as you plot a course for improvement, while also supporting your school and instructional leaders in ensuring our professional development makes a difference where it matters most—in the classroom and in students' lives.

Contact us today to start a conversation that will have a profound, positive impact on leader, teacher, and student success.

Visit McREL.org for more information on solutions for delivering high-quality instruction, leadership, and systems improvement.
